

Converters

Frequency static converters

We supply electric static converters to drive our electrospindles in the following versions :

- Electric static converters with protection degree IP 20 to be inserted inside the electric cabinet and driven by the CNC of the machine tool.
- Electric static converters with protection degree IP 54 to be inserted outside of the electric cabinet to drive the Electrospindle directly. It is possible to drive the spindle by the CNC of the machine tool as well.
- Electric static converters with vector control and protection degree IP 40 for special applications.
- Available frequencies up to 3.000 Hz.
